### No. 500— THE FIVE HUNDRED

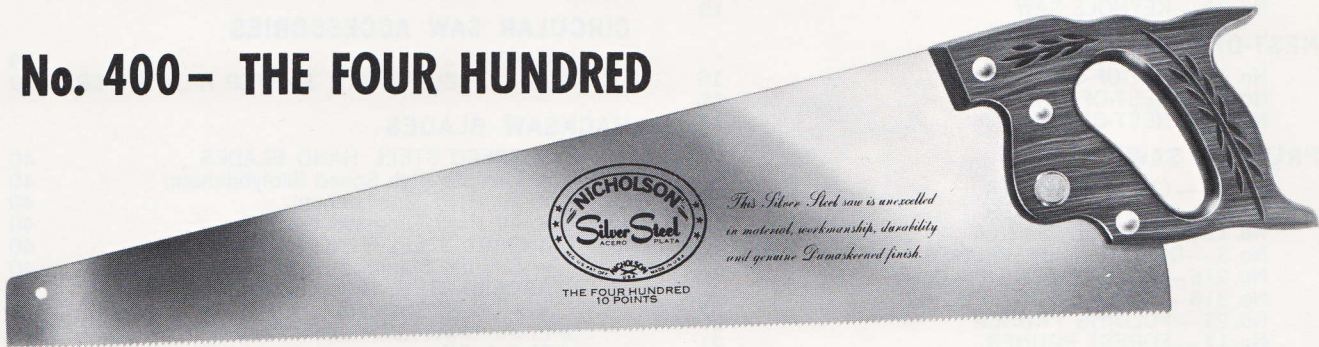

Nicholson's new **Stainless Steel** can be resharpened — and stays sharp 5 to 10 times longer, depending upon severity of use. Beautifully burnished, cross-stripe pattern — a finish that can't be dulled by time or weather.

Weatherproof handle made of 11-ply laminated hardwoods, handgraved, with Indian Honey finish; cannot warp, swell or split. The Nicholson 500 Stainless Steel is a truly superior saw for the professional craftsman.

LENGTH	CROSSCUT POINTS	WIDTH POINT	WIDTH BUTT	CAT. NUMBER	NO. PER BOX	WEIGHT PER BOX

26"	10	1 3/4"	6 5/16"	E-10010	1	2 lb. - 2 oz.

### No. 400— THE FOUR HUNDRED

Made for those who recognize and appreciate craftsmanship in a hand tool. The combined experience of generations is embodied in the design, balance and quality of this distinguished saw.

**Silver Steel construction.** Taper ground. Mirror-finish, ribbon edge. Needs little set for fast, free, easy cutting. Solid Hardwood Perfection handle with Honey finish, trimmed with nicked screws and medallion.

## POWER CUT CIRCULAR SAW BLADES

Nicholson POWER CUT Blades are made of top quality alloy steel, tensioned and spring set and fully polished. Protective plastic coating reduces drag of gum and pitch, resists rust. Diameter range includes industrial building contractor's sizes.

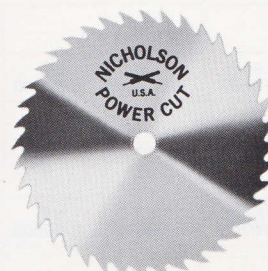

### CUTOFF

A special purpose blade for cutting against the grain of hard and soft woods. Can also be used as a rip on hard woods. Gives a smoother cut than general purpose combination blades.

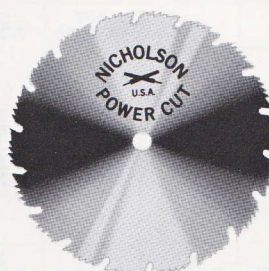

### RIP

Tooth style engineered for quick cutting along the grain of both hard and soft woods.

### ALL PURPOSE COMBINATION

Used for rip, mitre and crosscut work in soft woods, general carpentry. Most popular all-purpose blade sold.

### PLANER COMBINATION

Flat-ground planer (or Mitre) for smooth rapid cutting in any direction of the wood, hard or soft.

### CHISEL TOOTH COMBINATION

A free cutting saw in any direction, any wood. Rips, mitres and crosscuts. A fast cutting blade designed for portable saws.

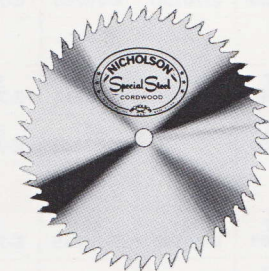

### HOLLOW GROUND PLANER COMBINATION

Hollow-ground for extremely smooth cutting in any direction. Practically eliminates sanding. Tooth designed for accuracy. With lubricant, may be used for soft non-ferrous metals.

### HOLLOW GROUND PLYWOOD

Hollow-ground with fine teeth for clean, splinterless cutting of laminates, veneers, etc. Cross-cuts and mitres.

### CORDWOOD SAWS

Deep, round-bottomed tooth gullets of these saws enable fast free cutting of brush, stovewood, logs or heavy timbers. Resharp-ening is easier, teeth are stronger with less danger of stripping under heavy feed.

For farm and ranch use, these saws have proved themselves through years of service. Available in a full range of diameters and hole sizes for both horizontal and vertical applications.

## PHOENIX CIRCULAR SAW BLADES

Phoenix blades are manufactured in 2 tooth styles, 5 specifications. Low priced but high in performance, these blades are hardened and tempered special steel, precision filed and set. Tooth rim is flame hardened — and can be resharpened. Universal center hole accommodates all popular saws. Attention getting display-designed and skin packaged for impulse sales.

**COMBINATION SMOOTH** — A smooth finishing all purpose blade. Can handle just about any job it is called upon to do. Rips, cross-cuts and mitres.

**FINE TOOTH PLYWOOD AND FLOORING** — Tooth is designed for plywood, masonite, thin sheet metal and non-ferrous work, knotty or nail-imbedded flooring.

# NICHOLSON HAND HACKSAW BLADES

## HIGH SPEED STEEL HAND BLADES

### Flexible High Speed—(Molybdenum) with graduated hardness

In developing our Flexible High Speed blade, Nicholson engineers have arrived at the perfect balance between the safety factor of the Shatterproof blade and the true cutting performance of the All Hard production blade. Recent developments in metallurgy permit this combination of toughness and flexibility, which practically eliminates breakage without sacrificing cutting ability.

The Flexible High Speed, which resists the heat generated in cutting, is a highest quality tool. Because of the safety factor, it is recommended if the operator lacks some experience. It is, of course, widely used by skilled operators under conditions where the safety element is vital.

Specify NF and appropriate code number.  
Packaged 100 blades per box.

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.

NF1224	12"	1/2"	.025"	24	Wavy	C-30045	4 1/4
NF1232	12"	1/2"	.025"	32	Wavy	C-30050	4 1/4

### All Hard Molybdenum—Long Life and Straight Cuts

When the workpiece can be firmly positioned and the operator needs the best hand blade for all around use, (excluding work requiring a Flexible blade), the All Hard Molybdenum is the logical choice.

The All Hard feature assures straight cuts and gives excellent results on abrasive or tough materials in the tool steel categories. In addition to the regular inspections, each blade is Rockwell tested for both maximum and uniform hardness.

Specify NM and appropriate code number.  
Packaged 100 blades per box.

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.

NM1232	12"	1/2"	.025"	32	Wavy	C-31050	4 1/4

### All Hard Tungsten (18-4-1)

This is definitely not a general use blade. On the contrary, it is premium priced, because it is specifically made for cutting the toughest materials with maximum efficiency.

While a relatively small percentage of all cutting jobs require the premium qualities built into the 18-4-1 Tungsten Blade, those jobs that do fall into that category make its selection advantageous. It is extremely effective on stainless steels, high manganese steels and certain bronzes.

When the work calls for this blade, it is a profitable investment in production efficiency. Each blade is individually inspected and Rockwell tested.

Specify NT and appropriate code number.  
Packaged 100 blades per box.

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.
NT1018	10"	1/2"	.025"	18	Raker	C-20010	3 1/2

NT1232	12"	1/2"	.025"	32	Wavy	C-20050	4 1/4

## STANDARD STEEL HAND BLADES

### Flexible Standard Hand Blades—for all purpose cutting

The Flexible Standard is an all around blade for general purpose cutting, especially on non-ferrous metals and low carbon steels. Because the teeth are hardened while the back remains flexible, breakage is reduced to a minimum, even when the work is being done in cramped and awkward positions. The special graduated hardening technique also makes the blade shatterproof.

Specify NS and appropriate code number.  
Packaged 100 blades per box.

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.
NS1018	10"	1/2"	.025"	18	Raker	C-10011	3 1/4
NS1024	10"	1/2"	.025"	24	Wavy	C-10016	3 1/4
NS1032	10"	1/2"	.025"	32	Wavy	C-10021	3 1/4
NS1214	12"	1/2"	.025"	14	Raker	C-10036	4
NS1218	12"	1/2"	.025"	18	Raker	C-10041	4
NS1224	12"	1/2"	.025"	24	Wavy	C-10046	4
NS1232	12"	1/2"	.025"	32	Wavy	C-10051	4

# NICHOLSON HAND HACKSAW BLADES

## STANDARD STEEL HAND BLADES

### All Hard Standard—for straight cuts

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.
NH1018	10"	1/2"	.025"	18	Raker	C-12011	3 1/4
NH1024	10"	1/2"	.025"	24	Wavy	C-12016	3 1/4
NH1032	10"	1/2"	.025"	32	Wavy	C-12021	3 1/4
NH1214	12"	1/2"	.025"	14	Raker	C-12036	4
NH1218	12"	1/2"	.025"	18	Raker	C-12041	4
NH1224	12"	1/2"	.025"	24	Wavy	C-12046	4
NH1232	12"	1/2"	.025"	32	Wavy	C-12051	4

The All Hard Standard, like the Flexible Standard, is a moderately priced blade for general work on carbon and low alloy steels. Unlike the Flexible Standard, however, the blade is hardened throughout, thus assuring the operator of straighter cuts when they are called for; for example, when the work being cut is rigidly held, as in bench sawing.

This blade does not take the place of the Flexible Standard in cramped or awkward positions.

Specify NH and appropriate code number.  
Packaged 100 blades per box.

## SPECIAL SHATTERPROOF

### Special Shatterproof—for thin stock—virtually indestructible

STOCK NUMBER	LENGTH	WIDTH	THICKNESS	TEETH PER INCH	TYPE	CAT. NUMBER	WEIGHT PER 100 in lbs.
SS1018	10"	1/2"	.025"	18	Raker	C-11010	3 1/4
SS1024	10"	1/2"	.025"	24	Wavy	C-11015	3 1/4
SS1032	10"	1/2"	.025"	32	Wavy	C-11020	3 1/4
SS1218	12"	1/2"	.025"	18	Raker	C-11040	4
SS1224	12"	1/2"	.025"	24	Wavy	C-11045	4
SS1232	12"	1/2"	.025"	32	Wavy	C-11050	4

Specially hardened to induce toughness, the Special Shatterproof is virtually indestructible. Because of this extreme toughness, one tooth coarseness greater than that normally recommended can be used. Thus the cutting speed on thin stocks can be increased. Note, however, that this blade is not recommended for higher carbon or alloyed steels.

Specify SS and appropriate code number.  
Packaged 100 blades per box.

## "LITTLE NICK"

ITEM	STOCK NUMBER	LENGTH	WIDTH	THICKNESS	CAT. NO.	PACKED
BLADE ONLY	LN0632	6"	1/4"	.014"	E-11370	10 to an envelope 10 envelopes per box
Frame and blade	LN1032	10"			E-11320	1 per envelope 10 envelopes per box

"Little Nick" is a Hacksaw Frame complete with blade for home workshop, kitchen drawer, machine or farm shop. Can be inserted to depth of 1 1/8" in hole as small as 5/8" diameter. For all around work and especially for cramped or awkward positions.

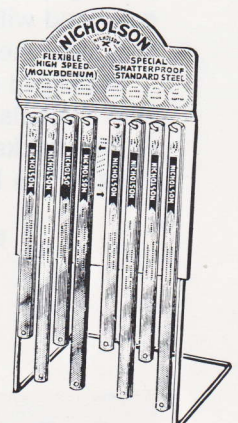

"Little Nick" Blades with Permanent Pin End—6" x 1/4" x .014—32 teeth per inch. Stock No. LN 0632. Package 10 to an envelope—ten envelopes to a box. Shipping wgt. per box 1 lb.

## HACKSAW FRAMES

### No. 8 HACKSAW FRAME

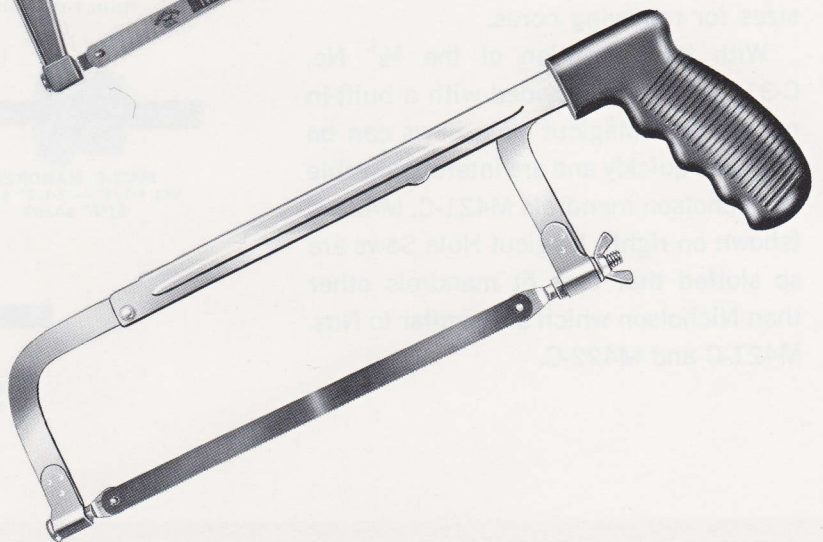

Adjustable advanced design provides three new features.

1. Blade is precision fitted between die cast square holes and blade stretchers. The more accurate alignment of the blade practically eliminates blade wobble. Adjustable for 10" or 12" blades.
2. Handle is die cast and reinforced for extra strength. This method is superior to flat wire and metal stamping.
3. New handle has plastic insert which is completely metal bound. For practical purposes, it is indestructible. Packed 6/Box.

Cat. No. E-16015

### No. 7 NICHOLSON ECONOMY FRAME

Designed for the hobbyist with only occasional need for a hacksaw. Sturdy, polished nickel frame has pistol grip, molded plastic handle.  $2\frac{3}{4}$ " throat and adjusts for 10" and 12" blades. Complete with Nicholson Standard Blade. Packaged 10 to a box.

\*BUILT-IN MANDREL

Designed by our engineers for electric drill owners who need a reasonably priced hole saw, Magicut is ideal. These saws will cut anything which a standard Hack-saw Blade will cut; the follow-through design permits the saw to follow through its own hole when extra-deep cuts are required. There are knock-out slots on all sizes for removing cores.

With the exception of the 5/8" No. C-310, which is provided with a built-in mandrel, all Magicut Hole Saws can be replaced quickly and are interchangeable on Nicholson mandrels M421-C, M422-C (shown on right). Magicut Hole Saws are so slotted that they fit mandrels other than Nicholson which are similar to Nos. M421-C and M422-C.

M422-C MANDREL  
fits 1-1/4" — 2-1/2" saws  
5/16" shank

M421-C MANDREL  
fits 3/4" — 1-1/8" saws

# NICHOLSON TEFLON

CARPENTER AND PRUNING SAWS WITH IMPROVED

*Nicholson presents TEFLON-S\* coated carpenter's handsaws and pruning saws with the improved and approved BLACK TEFLON-S coating. Teflon-S is a new formula non-stick, self-lubricating finish — combining high lubricity with high abrasion resistance. Smooth cutting with minimum effort — and prevents rust!*

## NO. 300T HANDSAW

All the advantages of Teflon-S coating combined with Nicholson's fine craftsmanship make this the saw for the experienced carpenter and craftsman. Double taper ground, set and filed, solid carved hardwood handle trimmed with nickeled screws and medallion. The finest Teflon-S coated handsaw on the market.

## NO. 175T HANDSAW

A popular priced, high quality saw for carpenters and home craftsmen. Features Nicholson quality plus Teflon-S coating. Set and filed. Laminated carved hardwood handle for extra strength. Trimmed with nickeled screws and medallion. A real sales builder!

\*TEFLON-S is DuPont's trademark for its stratified non-stick and self-lubricating finish.

# LE TO YOU THIS YEAR • SELF-LUBRICATING, ON-S\* HANDSAWS PROVED BLACK TEFLON-S NON-STICK FINISH

*A line of pruning saws selected for every pruning requirement. TEFLON-S coating eliminates binding in green, sappy, soft or hard woods.*

**THE SAW  
THAT DOESN'T  
STICK!**

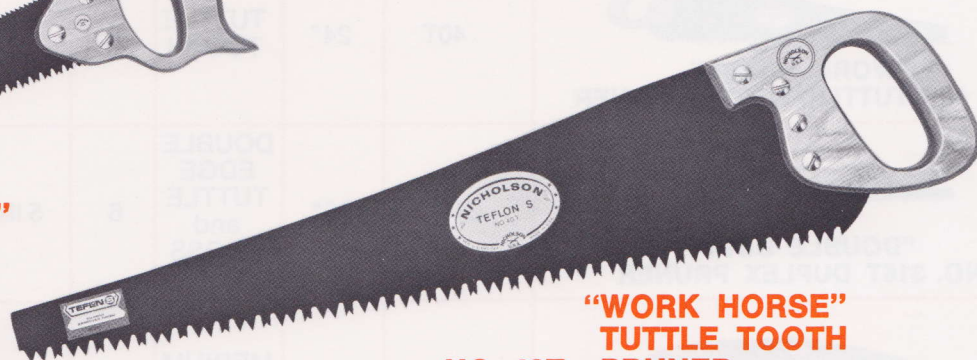

**"SILVER FLASH"  
TUTTLE TOOTH  
PRUNER**

Simply the finest heavy duty pruning saw made! Preferred by utilities and tree surgeons. Extra large teeth and gullets for speed cutting of large limbs. Flat ground. Hardwood plywood handle.

**"DOUBLE DUTY"  
DUPLEX  
PRUNER**

Fine tooth edge for light trimming. Tuttle Tooth edge for heavy cutting. Light weight—a good home owner seller. Flat ground—Natural finish plywood handle.

**"WORK HORSE"  
TUTTLE TOOTH  
PRUNER**

The perfect all-purpose saw for general use. Features the famous, fast-cutting Tuttle Tooth design. Flat ground—natural finish, special pattern plywood handle.

**"GARDENERS  
FAVORITE"  
CURVED  
PRUNER**

Designed for fast close cutting of thin limbs. Flat ground, new style hardwood handle.

**"HANDY"  
FOLDING PRUNER**

A lightweight fine tooth pruner. Folds for pocket carrying and tool box storage. Flat ground, polished hardwood handle.

## NICHOLSON GUARANTEE

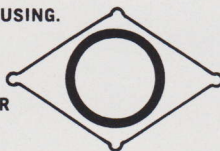

All products of our manufacture are guaranteed  
against defects in material  
or workmanship.

### RECOMMENDED TOOTH TYPE

#### TO SELECT THE CORRECT BLADE FOR YOUR POWER SAW:

- 1 MEASURE DIAMETER OF BLADE YOU ARE NOW USING.
- 2 DETERMINE SIZE AND TYPE OF ARBOR HOLE.\*
- 3 DETERMINE TOOTH TYPE BEST SUITED TO YOUR JOB FROM ABOVE CHART.
- 4 SELECT CORRECT BLADE FROM DISPLAY.

#### \*ARBOR HOLE INFORMATION

All blades from 6" through 8", except hollow ground are equipped with a universal arbor knockout hole.

Standard arbor hole measures 1/2".

If your saw arbor measures 5/8", knock out ring bushing.

If your saw arbor is diamond shaped, knock out diamond bushing.

IF YOUR JOB REQUIRES A HOLLOW GROUND BLADE, MEASURE SAW ARBOR AND SELECT BLADE WITH ARBOR HOLE TO FIT.

ABOVE RANGE OF ARBORS WILL ACCOMMODATE BLACK AND DECKER, DE WALT, SEARS, SKIL, SHOP CRAFT, SHOP MATE, THOR AND ALL OTHER POPULAR POWER SAW MAKES AND MODELS.

# Nicholson's Combination Saw Chain File Guide and Depth Gauge Tool –

**COMPLETE WITH FILE AND HANDLE**

*for Longer Saw Chain Life!*

**FOUR  
DIFFERENT ASSORTMENTS –  
ONE PRICE ON COLOR-STYLED,  
SKIN-PACKAGED DISPLAY CARDS**

Professional filers and chain saw users alike get longer saw chain life because the Nicholson filing guide takes the guesswork out of filing. Its built in angle gives truer, consistent filing and prevents too deep or too shallow filing. Each cutter is filed the same, resulting in a smoother, faster cutting and longer lasting saw chain.

## The modern way to sell Files

Nicholson, innovator of Skin Packed Files with plastic handles on modern counter displays, takes pride in this new model; a completely revised merchandiser with new dimensions in space and design and with added items for versatility. Handsome plastic handles are contoured to the shape of the hand. Extremely important to you is the dealer's margin of profit — approximately 40%.

Nicholson's forward looking, merchandising policies have convinced modern retailers of the advantages of bringing files into the open where they can produce the maximum profits. Nicholson's continued drive for better merchandising has created this stunningly beautiful new display. Read the full details on the other side of this page and order from your regular wholesaler.
